Light for comfort.

OSRAM BELLALUX SOFT®.

Light bulbs for harmonious light without glare.

SEE THE WORLD IN A NEW LIGHT

OSRAM

BELLALUX SOFT®

A matter of charisma.

- For harmonious light without glare.
- Available in 7 shapes and sizes.
- Available in 6 soft lighting colours.
- Can be used universally in all lamps.

Softness included.

BELLALUX SOFT® is the expressive alternative to classic light bulbs. It shines with a soft, beautiful and harmonious light.

Softness through technology.

Unlike conventional light bulbs, the inside of BELLALUX SOFT® is completely coated in white. The entire bulb glows, therefore, and not just the filament. This allows BELLALUX SOFT® to shine with a pleasantly soft, comfortable light that doesn't glare, even when you look directly at the lamp. It's thus particularly suited for use in open lighting fixtures.

Softness through shape.

Since BELLALUX SOFT® is now available in seven bulb shapes for universal use in many different types of lighting fixtures, soft light can now be used in almost every lamp:

- In an updated, large bulb form with T55 filament.
- In an updated, small bulb form with T45 filament.
- As a candle bulb with B filament.
- As a decorative GLOBE bulb that looks good even without a lamp, in four sizes with G filament.

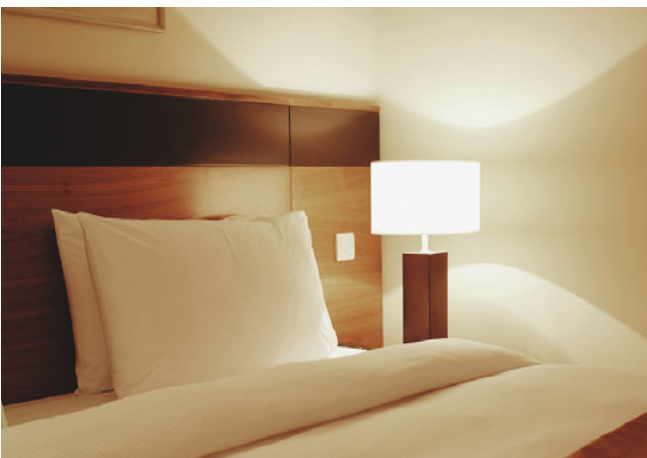

With E14 or E27 screw base and ten wattages from 25 W to 150 W. The BELLALUX SOFT® thus fits in all large and small lamps.

Softness through colour.

All bulb shapes are available in WHITE and are therefore the perfect alternative to normal light bulbs. Through the illumination of the entire filament, the light shines brightly, evenly, pleasantly, and above all, softly throughout the room – without glaring from any angle of view or disturbing the atmosphere of the room. The updated large and small bulb shapes T55 and T45 are also available in five soft pastel colours that allow you to influence the colouring and colour atmosphere of rooms.

The various colour tones allow the atmosphere of a room to be accentuated or altered.

	WHITE	shines brightly, but doesn't glare
	CITRON	shines like sunlight
	MANDARINE	emphasizes wood tones
	ROSÉ	freshens up warm colours
	AZUR	underscores cool objectivity
	JADE	makes plants look fresh

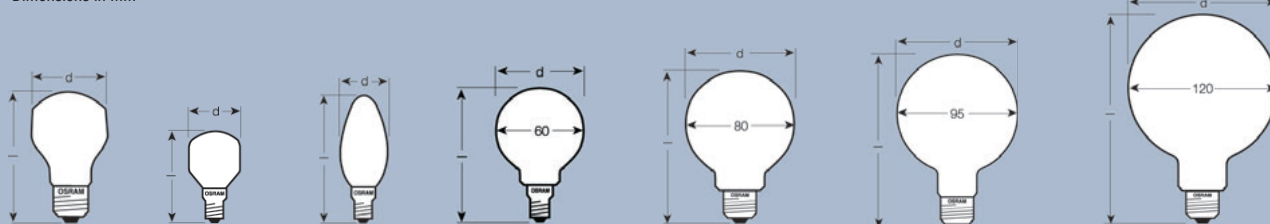

Six different bulb colours underscore the individual atmosphere of a room and accentuate specific interiors, such as wood.

The soft, pleasant light of Bellalux Soft® lends a particularly harmonious atmosphere to your rooms.
